	Acknowledgments	1
	Purpose and Target Audience	3
	A Historical Note	6
	Prerequisites	11
1	What Makes It Perfect?	16
2	All, Every, Each, Any, Exists, If P Then Q	22
3	Abstraction	38
4	Mappings	45
	4.1 Surjections	57
	4.2 Injections	65
	4.3 Bijections	75
5	Early Examples of Groups	92
	5.1 We See the Light	97
	5.2 Group Theory Takes a Ride	119
	5.3 Rectangle, Anyone?	134
	5.4 I Dance, You Dance, We Dance	169
	5.5 Negative Three Cows	188
6	Composition, Follow What Follows	200
7	A Difficult, Giant, Leap Forward	213

Contents

8	Binary Operations	242
9	Associativity	263
10	Group Axioms	285
10.1	Take 1, Associativity, Identity, Inverses: Existence, Uniqueness, Double-Sideness	295
10.1o	The Seven Group Axioms of Baer and Levi	302
10.2	Take 2, Associativity, Identity, Inverses: Existence, Double-Sideness	303
10.3	Take 3, Associativity, Identity, Inverses: Existence, Right-Sideness	317
10.4	Take 4, Associativity, Identity, Inverses: Existence, Left-Sideness	326
10.5	Take 5, Associativity, Unrestricted Group Division	334
11	A Zoo of Groups, the Hunt	343
11.1	Exercises 1: Sets of Numbers Under Addition and Multiplication	
11.2	Exercises 2: Sets of Numbers Under Addition and Multiplication	
11.3	Exercises 3: Vectors, XOR, Linear Real and Linear Fractional Complex Functions	
11.4	Exercises 4: Planar rigid motions	
11.5	Exercises 5: Invent a Group on 2 and on 4 Symbols	
11.6	Exercises 6: Invent a Group on 6 Symbols	
11.7	Exercises 7: Rotational Symmetry of Regular 3- and 4-gons	
11.8	Exercises 8: Modular Arithmetic, Part 1 of 4	
11.9	Exercises 9: Modular Arithmetic, Part 2 of 4	
11.10	Exercises 10: Modular Arithmetic, Part 3 of 4	
11.11	Exercises 11: Modular Arithmetic, Part 4 of 4	
11.12	Exercises 12: A Group-theoretic Proof of Fermat's Little Theorem	
11.13	Exercises 13: General Theory	
12	Thou Shalt Permute, Introduction to Rearranging Things	
12.1	Permutations: Composition, Identity, Inverses	
12.2	Permutations: It's Alive! It's A Group! It's A Proper Subgroup!	
12.3	Permutations: Cycles, Disjoint And Not	
12.4	Permutations: Disjoint Cycles, Properties Of	
12.5	Permutations: Transpositions, 15 Puzzle, Pile Of Money	
12.6	Permutations: Transpositions, The Fundamental Theorem	
12.7	Permutations: Parity, An Alternative View, Inversions	
12.8	Permutations: Exercises 1	
12.8	Permutations: Exercises 2	
13	Structure Matters: Multiplication Table of a Group	
13.1	Group Equations	
13.2	From Algebra To Geometry And Back	
14	Cyclic Groups: Motivation, Order of a Group Element	
14.1	Order of a Group Element, Exercises	
14.2	Order of a Group Element, Doodle Me This	
14.3	Order of a Group Element, Theorems 1	
14.4	Order of a Group Element, Theorems 2	
14.5	Order of a Group Element, Conjugate Elements, Theorems 3	
14.6	Generator Of A Group	
14.7	Generating Set Of A Group	
14.8	Examples 1: Reasonably Wild Shapes; Regular Polygons	
14.9	Exercises 2: Measure of Symmetry; Finite Cyclic Groups as a Table	
14.10	Exercises 3: Generators Interpreted, Birth of a Graph of a Group	

Contents

14.11	Exercises 4: Glimmers of Group Isomorphism
14.12	Exercises 5: Complex Beauty of the Beast
14.13	Exercises 6: Fundamental Properties; Minimal Generating Sets
14.14	Exercises 7: Direct Product Births a Graph of a Group
14.15	Exercises 8: Permutative Symmetry on Parade
15	Graph of a Group: Motivation, Basic Constructive S_n Mechanics
15.1	Cyclic Groups, Finite And Not
15.2	Finite Dihedral Groups, Introduction
15.3	Finite Dihedral Groups, Graphs Of D_3
15.4	Finite Dihedral Groups, Graphs Of D_4 and D_n
15.5	OrCS, Informal Fun With
15.5	Graph of S_3 , Right Triangular Prism
15.7	Graph of S_4 , Truncated Cube
15.8	Graph of S_4 , Truncated Octahedron
15.9	Graph of A_4 , Truncated Tetrahedron
15.10	The Quaternion Group, Construction Of
15.11	The Quaternion Group, A Graph Of
15.12	Groups Via Graphs
15.13	Cayley's Theorem, Take 1 Of 2, Visual Evidence
15.14	Cayley's Theorem, Take 2 Of 2, Algebraic Evidence
16	Generators and Defining Relations. Motivation. Introduction
16.1	Abstract and Generalize
16.2	The group C_4 via Generators and Defining Relations
16.3	The group D_4 via Generators and Defining Relations
16.4	The Dihedral Group D_4 : One Group, Many Faces
16.5	Dihedral Groups, Commutative Dwarfs and Gentle Giants
16.6	Exercises 1: Thou Shalt Be Direct
16.7	Exercises 2: More Direct Products, The Graphical Way
16.8	Exercises 3: They Are Perfectly Normal, Subgroups of Direct Products
16.9	Exercises 4: Graphs of Infinite Groups, Dihedral and Direct-Product
16.10	Exercises 5: For Curious Travelers, A Tad More Advanced
16.11	Exercises 6: For Curious Travelers, Deja Vu
16.12	Exercises 7: Extra For Experts 1
16.13	Exercises 8: Extra For Experts 2
17	Subgroups. A Mini-Me Inside Me
17.1	Exercises 1, Now You See Me, Now You Don't
17.2	Exercises 2, Can You Spot Me?
17.3	Exercises 3, To Infinity And Beyond
17.4	The Lagrange's Theorem. Cosets: Experiment
17.5	The Lagrange's Theorem. Cosets: Theorize
17.6	If Lagrange Then Fermat
17.7	Order Of A Two-Factor Product
18	Group Homomorphisms and Isomorphisms, Introduction
18.1	Homomorphisms: Exercises 1, Embeddings
18.2	Homomorphisms: Exercises 2, Not Embeddings or Quotient Maps 1
18.3	Homomorphisms: Exercises 3, Not Embeddings or Quotient Maps 2
18.4	Homomorphisms: Kernel Of Truth and Image Is Everything
18.5	Isomorphisms: Introduction, Exercises 1
18.6	Isomorphisms: Exercises 2, Fundamental Properties 1

Contents

18.7	Isomorphisms: Exercises 3, Fundamental Properties 2
18.8	Isomorphisms: The Cayley's Theorem
18.9	Isomorphisms: Exercises 4, Mappings To Subgroups
18.10	Isomorphisms: Exercises 5, Automorphisms 1
18.11	Exercises 6: Automorphisms 2
18.12	Isomorphisms: Symmetries of Solids. The Net Effect 1, A Cube
18.13	Isomorphisms: Symmetries of Solids. The Net Effect 2, A Regular Tetrahedron
18.14	Isomorphisms: Symmetries of Solids. Regular (Bi)Pyramids
18.15	Isomorphisms: Symmetries of Solids. Regular Tetrahedron The Structure of the Group of Rotational Symmetries of a Regular Retrahedron
18.16	Isomorphisms: Symmetries of Solids. Cubes The Structure of the Group of Rotational Symmetries of a Cube
18.17	Isomorphisms: Symmetries of Solids. Icosahedrons, Dodecahedrons, Duals
19	Normal Subgroups. Introduction. Motivation, Group Automorphisms 1
19.1	Motivation, Group Automorphisms 2
19.2	Definition 1, Group Automorphisms 3
19.3	Definition 2, Group Isomorphisms
19.4	Exercises 1
19.5	Factor Groups or Quotient Groups, Introduction
19.6	Factor Groups, It's A Group With A Vengeance
19.7	Factor Groups, Exercises 1
19.8	Factor Groups, Exercises 2
19.9	Factor Groups, Exercises 3
19.10	The Noether's Theorem on Group Homomorphisms
19.11	Normalizers (and Centralizers) 1, Motivation
19.12	Normalizers (and Centralizers) 2, Basic Properties
19.13	Semidirect Products 1, Motivation
19.14	Semidirect Products 2, Examples: Cyclic Groups
19.15	Semidirect Products 3, Examples: More Cyclic Groups
19.16	Semidirect Prorudcts 4, Examples: A Conjecture In The Making
19.17	Semidirect Products 5, Conjecture To Theorems Conversion
19.18	Semidirect Products 6, Examples: The Klein Four-Group
19.19	Semidirect Products 7, Examples: The Dihedral group \bar{D}_3
19.20	Semidirect Products 8, A More General Way: A Graph Of
19.21	Semidirect Products 9, A More General Way: An Algebraic Definition Of
23.22	Semidirect Products 10, The Basic Algebra Of
20	Symmetric and Alternating Groups, Symmetric Polynomials (In Two Variables)
20.1	Anti-Symmetric or Alternating Polynomials (In Three Variables)
20.2	Commutators, Commutator Subgroups 1. Definitions
24.3	Commutators, Commutator Subgroups 2. Exercises, Lamina
24.4	Commutators, Commutator Subgroups 3. Exercises, Regular Tetrahedrons
24.5	Commutators, Commutator Subgroups 4. Exercises, Cubes and Regular Octahedrons
20.6	Commutattors Go Big. The Hall-Witt Identity
20.7	Solvable Groups 1
20.8	Solvable Groups 2
	The Quaternion Group, A Time Compressed Why
	Biology Of Mathematics
	A Crazy Idea
